NEMSIS Data Dictionary Version 3.4.0

NEMSIS Overview and Summary

The NEMSIS data dictionary was developed through a collaborative effort with the EMS industry, including web-based reviews, public comment periods, focus groups, industry dialogue, topic-focused projects, and consensus. The National EMS Information System Version 3 represents a major revision from Version 2 released in 2005. Adopting a broad perspective, the initiative to move to a 3rd version of the NEMSIS data dictionary was fueled by the need to improve data quality, enhance our ability to assess EMS performance, augment the flexibility of the standard for state adoption and, to move the NEMSIS standard into the Health Level 7 (HL7) organization for approval as an American National Standards Institute (ANSI) standard.

NEMSIS Version 3 Element Configuration from v2.2.1

NEMSIS NHTSA Uniform PreHospital Dataset	Version 2.2.1	Version 3.3.4	Version 3.4.0
Demographic (Agency) NEMSIS Version 3 DataElements	110 (26%)	155 (27%)	157
Existing (version 2.2.1)	88 (80%)	87 (56%)	87 (55.5%)
New		68 (44%)	70 (44.5%)
Retired	22 (20%)		
EMS (ePCR) NEMSIS Version 3 Data Elements	315 (74%)	423 (73%)	428
Existing (version 2.2.1)	258 (82%)	260 (61%)	258 (60%)
New		165 (39%)	170 (40%)
Retired	57 (18%)		2
Overall Total NEMSIS Version 3 Data Elements	425	578	585
Existing (version 2.2.1)	346 (81%)	347 (60%)	345 (59%)
New		232 (40%)	240 (41%)
Retired	79 (19%)		2

NEMSIS Version 3 Element Configuration

Total Elements including the Custom Elements: 585

Excluding the Demographic and EMS (ePCR) Custom Elements: 561

Total National Elements	165	Total State Elements	104	Total "Other" Element	316
Mandatory	37	Recommended	83	Excluding the custom elements	292
Required	128	Optional	21	Demographic (Agency) Elements	90
Demographic (Agency) Elements	35	Demographic (Agency) Elements	32	Excluding the custom elements	78
Mandatory	22	Recommended	32	EMS (ePCR) Elements	226
Required	13	Optional	0	Excluding the custom elements	214
EMS (ePCR) Elements	130	EMS (ePCR) Elements	72		
Mandatory	15	Recommended	51		
Required	115	Optional	21		

NEMSIS Version 3.4.0 Data Dictionary Content

**Note: The numbers to the right of the content listed below represent the location for each element on the Sample Page of the Data Dictionary (page vi).

Data Element Number (1)

- The NEMSIS Version 3 element numbering system has been revised to improve the information derived from just the data element number. An example of a data element number is dAgency.01.
 - The data element number begins with either a "d" representing the demographic (agency) section or an "e" representing the EMS PCR section.
 - A one-word descriptor for each section is now included in the data element number.
 - A period separates the section (e.g., dAgency) from the data element number (e.g., 01).

National and State Element Indicator (2) (5) (6)

- National = Yes, it is an indication that the data element is required to be collected at the local EMS agency level and submitted to the state.
- State = Yes, it is an indication that the data element is recommended to be collected at the State level.

Data Element Name (3)

• The name of the data element.

Data Element Definition (4)

The definition of the data element.

Version 2 Number (7)

- The NEMSIS Version 2.2.1 Data Element Number.
- If the Data Element is new to Version 3.4.0, the Version 2 Number will be blank.

Data Structure Information

- Recurrence (12)
 - •An indication that the data element can have more than one value.
 - •Represented by two characters separated by a colon. The configuration includes:
 - •0:1 = element is not required and can occur only once.
 - •0:M = element is not required and can repeat multiple times.
 - •1:1 = element is required and can occur only once.
 - •1:M = element is required and can repeat multiple times.
- Usage (8)
 - Indication of when the data element is expected to be collected.
 - Mandatory = Must be completed and does not allow for NOT values.
 - Required = Must be completed and allows NOT values.
 - **Recommended** = Does not need to be completed and allows NOT values.
 - **Optional** = Does not need to be completed and does not allow for NOT values.
- NOT Value Characteristics (10)
 - Indication that the data element can have NOT values.
 - NOT Values are used (where permitted) to document that a data element was not applicable, not completed, or not collected by the state.
 - NOT Values are documented as an attribute of an element. It allows the documentation of NOT value when the real value is not documented.
 - Please reference the NEMSIS White Paper describing the use of NOT Values, Pertinent Negatives, and Nill:

https://nemsis.org/media/nemsis_v3/master/UsageGuides/NEMSIS_V3_1_EMSDataSet_Pertine
NOT Values Accepted (14)

- Indication of which of the following three NOT values is acceptable.
- •Not all data elements accept NOT values.
- •NOT Values have been condensed in Version 3.
 - •**Not Applicable** = The data element is not applicable or pertinent.

- Not Recorded = The data element is considered applicable, but was left blank. The software should auto-populate it with "Not Recorded".
- Not Reporting = The data element is not collected by the EMS agency or state. This NOT value does not apply to National elements where Usage is specified as "Required".
- Pertinent Negative Values (PN) (9) (14)
 - A list of Pertinent Negative Values which can be associated with a data element.
 - Not all data elements accept Pertinent Negative Values.
 - Pertinent Negative Values are documented as "an attribute" of an element. It allows the documentation of pertinent negative value in addition to the documentation of "real" value.
 - Please reference the NEMSIS White Paper describing the use of NOT Values, Pertinent Negatives, and Nill:

https://nemsis.org/media/nemsis_v3/master/UsageGuides/NEMSIS_V3_1_EMSDataSet_Pertine • Example of use:

- Example #1 Aspirin Administration:
 - If the medication Aspirin is part of the agency protocol for Chest Pain but was not administered by the responding crew, the reason why should be documented. This is done through the use of Pertinent Negative Values. If the patient took the Aspirin prior to the EMS arrival on the scene, the value "Medication Already Taken" should be documented in addition to "Aspirin".
- Is Nillable (11)
 - Indication that the element can accept a "blank" value.
 - If the element is left "blank", the software must submit an appropriate value of one of the two attributes: Pertinent Negative or NOT Values.

Associated Performance Measure Initiatives (13)

- Indication that the data element has value in describing, defining, or measuring EMS from a performance perspective. Performance Measures can be associated with EMS service delivery, patient care, or both. The following service delivery or time-dependent illness/injury performance measure topics have been included in NEMSIS Version 3:
 - Airway Airway Management
 - Cardiac Arrest Out of Hospital Cardiac Arrest
 - Pediatric Acute Pediatric Care
 - Response EMS Response Time
 - STEMI ST Elevation Myocardial Infarction (STEMI)
 - Stroke Acute Stroke Care
 - Trauma Acute Injury/Trauma Care

Attributes (14)

•An attribute provides extra information within an element.

For information related to the first three attributes, please see the NEMSIS document 'How to Utilize NEMSIS V3 "NOT values/pertinent negatives/nillable':

https://nemsis.org/media/nemsis_v3/master/UsageGuides/NEMSIS_V3_1_EMSDataSet_Pertinent_Ne

The following are possible attributes:

- PN (Pertinent Negative)
 - •8801001 Contraindication Noted
 - 8801003 Denied By Order
 - •8801005 Exam Finding Not Present
 - •8801007 Medication Allergy
 - •8801009 Medication Already Taken
 - •8801013 No Known Drug Allergy
 - •8801015 None Reported
 - •8801017 Not Performed by EMS
 - 8801019 Refused
 - 8801021 Unresponsive
 - •8801023 Unable to Complete

8801025 - Not Immunized

- •8801027 Order Criteria Not Met
- 8801029 Approximate
- •8801031 Symptom Not Present
- •NV (Not Value)
 - •7701001 Not Applicable
 - •7701003 Not Recorded
 - •7701005 Not Reporting

•Nillable xsi:nil="true"

- Code Type

 9924001 = ICD-10
 9924003 = RxNorm
 9924005 = SNOMED-CT

 CorrelationID

 Data Type = String
 minLength = 0
 maxLength = 255

 DistanceUnit
 - 9921001 Kilometers • 9921003 - Miles
- EmailAddressType
 9904001 Personal
 9904003 Work
- nemsisCodeData Type = String
- nemsisElement
 Data Type = String
- nemsisValueDescription
 Data Type = String
- PhoneNumberType
 - •9913001 Fax
 - •9913003 Home
 - •9913005 Mobile
 - 9913007 Pager
 - •9913009 Work
- ProcedureGroupCorrelationID
 Date Type = CorrelationID

StreetAddress2

- Data Type = String
- minLength = 1
- maxLength = 255

TimeStamp

- Data Type = DateTime
- minValue = 1950-01-01T00:00:00-00:00
- •maxValue = 2050-01-01T00:00:00-00:00

•UUID

- •UUIDs must be generated using the IETF RFC 4122 standard.
- RFC 4122 defines four algorithms for UUID generation, any of these four can be used.
- UUIDs must be represented in canonical form, matching the following regular expression:
- $[a-fA-F0-9]\{8\}-[a-fA-F0-9]\{4\}-[1-5][a-fA-F0-9]\{3\}-[89abAB][a-fA-F0-9]\{3\}-[a-fA-F0-9]\{12\}-[a-$
- VelocityUnit
 - 9921001 Kilometers per Hour
 - 9921003 Miles per Hour

Code List (16)

- •A list of values associated with the data element. Not all data elements have predefined value sets.
- Codes for each value:
 - The codes are based on a 7-digit number, in a 2-2-3 pattern (without dashes).
 - The first set of two numbers represent the data section.
 - The second set of two numbers represent the element number.
 - The last set is a 3-digit number for each value beginning at 001; The codes increase in increments of two (2).
 - Codes are typically sequential (by two) and alphabetical. Some ordering is provided in an
 effort to present information based on workflow.
 - Several values and codes reference external standards such as ICD-10, RxNorm, SNOMED, etc. NEMSIS will assist in providing a recommended list of EMS specific values and codes from these larger standards for most elements using these external standards.

Data Element Editorial Comments (17)

 Comments are provided to describe additions, changes, clarifications, or additional insight into the data element.

Version 3 Changes Implemented (18)

 Comments are providing insight into specific Version 3 changes, such as new or revised data elements.

Element Deprecated(19)

 Elements that are signified as "deprecated" will be removed from a future version of the NEMSIS standard. Their use should now be avoided but will be supported until they are removed from the standard.

Associated Validation Rules (20)

• A list of national Schematron validation rules associated with the element. Additional validation rules may be implemented at the state or local level.

Constraints						
Data TypeminLstring1	.ength	m 15	axLength			

Data Element Comment

This is the primary identifier for the entire Demographic Section. Each of the Demographic sections must be associated with an EMS Agency Number. An EMS Agency can have more than one Agency Number within a state. This reflects the ability of an EMS Agency to have a different number for each service type or location (based on state implementation). The EMS Agency Number in dAgency.02 can be used to auto-populate eResponse.01 EMS Agency Number in the EMS Event section.

dAgency.04

State

[0-9]{11}

Data Element Comment

This data element was added to better document the service area of the EMS Agency. Each state listed is associated with the counties, census tracts, and ZIP codes within the EMS Agency Service Area for each state.

The format of the census tract number must be an 11-digit number, based upon the 2010 census, using the pattern: 2-digit State Code 3-digit County Code 6-digit Census Tract Number (no decimal)

Example: NEMSIS TAC office (UT, Salt Lake County, Census Tract - located at 295 Chipeta Way, Salt Lake City, UT) 49035101400

Census Tract Data Website (files and descriptions): https://www.census.gov/geographies/reference-maps/2010/geo/2010-census-tract-maps.html

Associated Validation Rules Rule ID Level Message â_dAgency.06 Warning EMS Agency Census Tracts should belong to a county recorded in EMS Agency Service Area County(ies) in the state with which it is grouped. â\NvPn_Nil_Nv Error When EMS Agency Census Tracts is empty, it should have a Not Value (Not Applicable, Not Recorded, or Not Reporting, if allowed for the element) or a Pertinent Negative (if allowed for the element), or it should be omitted (if the element is optional). â\NvPn_Nv_Nil Error When EMS Agency Census Tracts has a Not Value (Not Applicable, Not Recorded, or Not Reporting), it should be empty.

Data Element Comment

The Level of Service is associated with the specific EMS Agency Number (dAgency.02) for the EMS Agency. For example, a BLS licensed ambulance service (EMT-Basic) with EMT-Intermediate or EMT-Paramedic on staff, the appropriate level of service is "EMT-Basic". This is because the care provided to patients is limited to BLS skills.

The category EMT-Intermediate includes EMS professionals with an "85" or "99" certification level.

dAgency.12

National

dAgency.12 - Organization Status

Definition

The primary organizational status of the agency. The definition of Volunteer or Non-Volunteer is based on state or local definitions.

9914223 Medical-Respiratory Distress-Croup

9914225 Medical-Stimulant Poisoning/Overdose

Data Element Comment

This data element should capture all of the protocols permitted by the state for any/all levels of EMS personnel in the state. This is associated with the EMS Agency State (dAgency.01).

States can add additional protocols to the list but the additional state protocols must map to these uniform codes.

The list is defined by the NASEMSO State Medical Directors.

The EMS agency should submit "Not Applicable" and "Nil" to the state system for the demographic export. The state EMS system does not need to import this information into their database. It is the responsibility of the state to submit this element to the national EMS database (NEMSIS). Reference the Demographic Dataset Submission Guide for further details.

Version 3 Changes Implemented

Added to better identify states with statewide protocols and define state EMS capability and care.

Associated Validation Rules

Data Element Comment

This is associated with the EMS Agency Number (dAgency.02) since each EMS Agency Number may have different capabilities.

State and local entities can add additional protocols to the list but the additional protocols must map to these uniform codes.

The list is defined by the NASEMSO State Medical Directors.

National

dConfiguration.11 - EMS Agency Specialty Service Capability

Definition

Special training or services provided by the EMS Agency and available to the EMS service area/community.

2212029	Vehicle Failure of this Unit
2212031	Weather
2212033	EMS Crew Accompanies Patient for Facility Procedure

Data Element Comment

Rendezvous Transport Unavailable added for situations where there is a wait for an EMS Transport Unit, a Ferry, Air Medical, etc. to return to service.

If a patient is being transported by the unit, turn-around delay is any time delay that occurs from the time the patient arrived at the destination (eTimes.11) until the time the unit is back in service (eTimes.13) or unit back at the home location (eTimes.15) [whichever is the greater of the two times].

If no patient is being transported by the unit, turn-around delay is any time delay that occurs from the time the unit arrived on scene (eTimes.06) until the unit is back in service (eTimes.13) or the unit back at the home location (eTimes.15) [whichever is the greater of the two times].

Code Lis	t						
Code 2215001 2215003 2215005 2215007 2215023 2215009 2215011 2215013 2215013 2215017 2215017 2215019 2215021	BLS-Community Para ALS-AEMT ALS-Intermediate	amedicine amedicine					

Data Element Comment

Added to identify the level of care (license level) the EMS unit/crew can provide regardless of patient need, based on this unit's capabilities.

For example, if a unit/crew is staffed with an EMT-Intermediate or EMT-Paramedic but the unit is either licensed or stocked at a BLS level the appropriate level of care is "BLS-Basic". This is because the care provided to patients is limited to BLS skills.

This element	This element is a component of the Utstein Cardiac Arrest Criteria as identified in the American Heart Association journal				

This element is a component of the Utstein Cardiac Arrest Criteria as identified in the American Heart Association journal "Resuscitation" from 2004 entitled "Cardiac Arrest and Cardiopulmonary Resuscitation Outcome Reports". http://circ.ahajournals.org/cgi/content/full/110/21/3385

This element needs to be documented when the patient has been in cardiac arrest and transported to a healthcare facility to show the change in patient condition, if any.

Any ROSC is defined as any brief (approximately >30 seconds) restoration of spontaneous circulation that provides evidence of more than an occasional gasp, occasional fleeting palpable pulse, or arterial waveform.

Data Element Comment						

This element is a component of the Utstein Cardiac Arrest Criteria as identified in the American Heart Association journal "Resuscitation" from 2004 entitled "Cardiac Arrest and Cardiopulmonary Resuscitation Outcome Reports". http://circ.ahajournals.org/cgi/content/full/110/21/3385

Changed from estimated time prior to EMS arrival to date/time of cardiac arrest.

DateTime consists of finite-length characters of the form: yyyy '-' mm '-' dd 'T' hh ':' mm ':' ss ('.' s+)? (zzzzz)

уууу	a four-digit numeral that represents the year
2	separators between parts of the date portion
mm	a two-digit numeral that represents the month
dd	a two-digit numeral that represents the day
Т	separator that indicates time-of-day follows
hh	a two-digit numeral that represents the hour
':'	a separator between parts of the time-of-day portion
mm	a two-digit numeral that represents the minute
SS	a two-integer-digit numeral that represents the whole seconds
'.' s+	(not required) represents the fractional seconds
zzzzz	(required) represents the timezone (as described below)

Timezones, required, are durations with (integer-valued) hour and minute properties in the form: ('+' | '-') hh ':' mm

hh	a two-digit numeral (with leading zeros as required) that represents the hours
mm	a two-digit numeral that represents the minutes
'+'	a nonnegative duration
121	a nonpositive duration

Data Element Comment

Protocols are grouped into Airway, Environmental, Exposure, General, Injury, Medical, and OB/GYN.

There is a new data element eProtocols.02 to indicate whether the protocol is Adult, Pediatric, or General (both).

State and local entities can add additional protocols to the list but the additional protocols must map to these uniform codes. The protocol code list should be derived from dConfiguration.05 and/or dConfiguration.10

DateTime consists of finite-length characters of the form: yyyy '-' mm '-' dd 'T' hh ':' mm ':' ss ('.' s+)? (zzzzz)

уууу	a four-digit numeral that represents the year
Ч	separators between parts of the date portion
mm	a two-digit numeral that represents the month
dd	a two-digit numeral that represents the day
Т	separator that indicates time-of-day follows
hh	a two-digit numeral that represents the hour
':'	a separator between parts of the time-of-day portion
mm	a two-digit numeral that represents the minute
SS	a two-integer-digit numeral that represents the whole seconds
'.' s+	(not required) represents the fractional seconds
zzzzz	(required) represents the timezone (as described below)

Timezones, required, are durations with (integer-valued) hour and minute properties in the form: ('+' | '-') hh ':' mm

hh	a two-digit numeral (with leading zeros as required) that represents the hours
mm	a two-digit numeral that represents the minutes
'+'	a nonnegative duration
'-'	a nonpositive duration

Version 3 Changes Implemented

Added to better document performance measure for acute time dependent illness and injury systems of care.

Data Element Comment

The list of values and codes is based on and in compliance with the Medicare Claims Processing Manual Chapter 25 Completing and Processing the Form CMS-1450 Data Set, referencing the Uniform Bill - Form CMS-1450 (UB-04) and the FL 17 - Patient Discharge Status Required. (For all Part A inpatient, SNF, hospice, home health agency (HHA) and outpatient hospital services.) This code indicates the patient's status as of the "Through" date of the billing period (FL 6).

Codes are available from Medicare contractors and the National Uniform Billing company (NUBC <u>http://www.nubc.org</u>) via the NUBC's Official UB-04 Data Specifications Manual.
