Late Breaking Revision Requests
For initial review at the NEMSIS V3 Implementation Meeting (Aug 20, 21) at Deer Valley Utah and follow-up review during two V3 Implementation Conference Calls
Requested Revision Voting

• Please vote (using the following options) after discussion of each topic:
  – **AGILE**: Request should move forward. Information necessary to resolve the request is available.
  – **DEFER**: Request should be deferred to a future revision. Revision has merit, but is too complex, too extensive, missing needed information to include in v3.5.0.
  – **DECLINE**: Request should not move forward or be reconsidered.

Current Available Voting

- **Left Side:** Voting results based on V3 Implementation Meeting Workgroup in Deer Valley.
- **Right Side:** Voting results from last two V3 Implementation calls
Revise: eTimes (ID LB-1)

• eTimes.09 – Unit Left Scene Date/Time

• Change: Modify Definition:
  • Current: The date/time the responding unit left the scene with a patient (started moving).
  • Proposed: The date/time the responding unit left the scene (started moving).

– Comment: Requested by Kevin Putnam, discussed on DMC Listserv.
Revise: dContact (ID LB-2)

• Deprecate dContact section
  – Move: dContact.05 through.12 to dAgency
  – Move: dContact.01 to dPersonnel
  – Deprecate: dContact.02 through .04
  – Move: dContact.EMSMedicalDirectorGroup to dPersonnel
  – Comment: Requested by Chip Cooper (see next slide)
Move all of these to dAgency as the agency needs a single contact that is just tied to the agency. Currently it is impossible to produce "the" address, phone, email, web address for an agency because of the dContact setup and 0:M group option.

Add this to dPersonnel

Already collected in dPersonel

Move group to dPersonel to work with Agency Contact type
Revise: eAirway (ID LB-3)

- eAirway.04 - Airway Device Placement Confirmed Method
  - Change: Add value
    - Chest Rise
  - Comment: Requested by Chip Cooper: “A standard confirmation method”.

    • Cardiac Arrest
