

Agency Demographics

The Value and Use Cases for Updated DEM Files

Problem Statement

- Feds and NASEMSO cannot identify (respond to) areas of need
 - Funding/Financial Solvency
 - Resource needs
 - Personnel/Staffing
 - Mergers/Closures
- Cannot respond to inquiries regarding counts, configurations or, changes over time

Questions for Consideration

- What impediments exist that hinder updating agency DEM files on a routine basis?
- Are NEMSIS agency DEM files “redundant” with other State licensure systems?
- Should we standardize a “reminder system” to update DEM files?
