2022 PUBLIC-RELEASE RESEARCH DATASET
NOW AVAILABLE

51,379,493	13,946	54
EMS ACTIVATIONS	**EMS AGENCIES**	**STATES AND TERRITORIES**

The National Emergency Medical Services Information System Technical Assistance Center (NEMSIS TAC) today announced the availability of the 2022 Public-Release Research Dataset, the largest publicly available dataset of emergency medical service activations in the United States. With this release, NEMSIS aims to improve understanding of, confidence in, and support for EMS data collection and analysis that will lead to data being utilized more effectively to improve patient care.

The 2022 Public-Release Research Dataset is a subset of the National EMS Database that is the repository for EMS data collected from U.S. States and Territories. NEMSIS maintains the national standard for how patient care information resulting from an emergency 911 call for medical assistance is collected.

The dataset includes 51,379,493 EMS activations submitted by 13,946 EMS agencies servicing 54 states and territories.

Those interested in requesting a copy of the 2022 Public-Release Research Dataset can contact the NEMSIS TAC and fill out a request form at their website https://nemsis.org/using-ems-data/request-research-data.

A password-protected USB drive containing the dataset, the 2022 NEMSIS Data User Manual, NEMSIS Data Dictionary v3.4.0, and Extended Data Definitions v3.4.0, will be sent via postal service.
