Overview

This report provides an overview of the key projects led by the NEMSIS Technical Assistance Center (TAC) during the past month.

Stakeholder Appreciation

We extend gratitude to the thousands of EMS clinicians, state and territory EMS offices, software vendors, and national partners whose dedication makes the EMS data collection possible. Your efforts ensure that EMS data can guide evidence-based care, shape policy, and improve patient outcomes nationwide.

Stakeholder Engagement

v3 Implementation Calls

[October 8: v3 Implementation Call](#)

Attendees: 115 (Representatives from 21 States and 29 Vendors)

[October 22: v3 Implementation Call](#)

Attendees: 118 (Representatives from 23 States and 32 Vendors)

Upcoming NEMSIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:

- November 12
- November 26 - *Canceled for the Thanksgiving Holiday*

Link to join: <https://utah-health.zoom.us/j/8085088800>

NEMSIS Public Training

A public training was held on Tuesday, October 7, 2025, and presented by Randall Eimerman, NASEMSO's NEMSIS Liaison. He led the session and explained what custom values are, how they're used, and where to find helpful guides on the NEMSIS website. He also reviewed the National Custom Element Library and explained how the NASEMSO Data Managers Council reviews and manages custom elements. Participants gained practical advice on how to implement custom elements in their systems and learned how elements become part of the official NEMSIS Standard. Whether you're new to custom elements or looking to improve how you use them, this training will help you better understand the process and tools available. You can click here to access the [October Public Training](#).

If you want to suggest a training, please submit the topic using the [NEMSIS Help Desk](#).

NEMSIS Critical Patch Update

October 1, 2025, the NEMSIS TAC released resources for implementing Critical Patch v3.5.0 (CP6) and v3.5.1 (CP2). The resources relate to changes made to ePatient.25 and to a 1:1 recurrence. The new XML and data dictionaries are available on the NEMSIS website.

Provided below are direct links to the CP6 and CP2 data dictionaries.

- [NEMSIS Version 3.5.0 CP6 EMS/DEM/State Data Dictionary](#)
- [NEMSIS Version 3.5.1 CP2 EMS/DEM/State Data Dictionary](#)

The NEMSIS TAC was requested to survey State Data Managers and ePCR Vendors regarding their plans to implement the NEMSIS v3.5.0 Critical Patch. The survey results are aggregated in an excel spread sheet and available on the [NEMSIS website](#) and linked here [survey results](#).

State Data Manager Annual Report

The NEMSIS TAC has published the [State Data Manager Annual Report Template](#).

This resource was created to help state EMS data managers compare their state data to national benchmarks. This customizable template includes sections on EMS activations, patient demographics, clinical data, performance measures, and more. Most slides feature national data on the left and space for your state's data on the right. You can easily add or remove slides, insert your own charts or images, and export the report in multiple formats including PDF, Word, image files, or PowerPoint Show.

We encourage you to download the customizable PowerPoint template to create your state's annual EMS data report, featuring national benchmarks from NEMSIS and flexible formatting options. ([Intro video](#))

NEMSIS/ NASEMSO Collaboration

Agenda topics from the NEMSIS/NASEMSO Data Managers Council (DMC) meeting:

- Presented the new visualization of the NEMSIS Versioning Process
- Discussed ideas for initiating a review of nationally submitted blood transfusions by state
- Reviewed the survey results of the critical patch transition for states and vendors
- Discussed the v3.5.1 state transition plans
- Announced the availability of the new annual report state template

v3 Software Vendor Compliance

The [V3 Compliant Software Testing Status](#) page reflects v3.5.0 and v3.5.1 compliant software products and the companies that are now completing the critical patch testing. A list of all NEMSIS-compliant software products and companies seeking compliance can be found on the website.

In Compliance Testing NEMSIS v3.5.0 Collect Data

ESO Solutions, ESO EHR, v5.1

Texas Health and Human Services, EMSTR, v1.0

In Compliance Testing NEMSIS v3.5.1 Collect Data

Emergency Networking, ENcharge, v3.5

AngelTrack, Mockingbird, v2.1

Beyond Lucid, Mediview, v4.x

ESO Solutions, ESO EHR, v5.1

EPR Systems, FireWorks, v1.5

First Due, First Due, v1.0

HealthCall, HealthCall, vx

Saffire Software, MetroPCR, v3.x

In Compliance Testing NEMSIS v3.5.0 Receive and Process

Ohio Department of Public Safety, EMSIRS, v3.5.0

Completed NEMSIS v3.5 Collect Data

INETCORE Software Solutions Inc, INCSS-ePCR, v3.5.1

Completed NEMSIS v3.5.1 Collect Data

Texas Health and Human Services, EMSTR, v1.0

v3.5.0 Compliant Software Products

v3.5.0 & v3.5.1 Receive & Process Software

v3.4 and v3.5 Data Submission Summary

The NEMSIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using both the v3.4 and v3.5 data standards.

The counts listed below represent activity from January 1, 2025, through October 31, 2025. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.4 standard were 1,588,173 records from 1,717 agencies.
State submissions using the v3.5 standard were 50,660,391 records from 13,960 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for v3.4 and v3.5 data submissions is 0.71%.

v3 Data Use Agreements

We encourage State EMS Data Managers and Directors to continue efforts to execute the [NEMSIS v3.5 DUA](#).

The TAC works closely with the University of Utah's Office of Sponsored Projects (OSP) and the Privacy Compliance Office to review all legal modifications to the standard DUA. We are committed to working with officials in each state and territory to ensure that the DUA meets the needs of each respective state agency. Please contact Monet.Iheanacho@hsc.utah.edu to complete the DUA agreements.

Okta User Accounts

All NEMSIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. All accounts inactive for 60 days are automatically locked.

If you need to reset your password, use the [Forgot Password](#) link located in the footer of the NEMSIS website. If you are unsuccessful with the password reset, wait 30 minutes and try again. If you are still unsuccessful with the reset instructions, submit a [Help Desk Ticket](#) and choose General NEMSIS Questions from the options. Passwords for Okta accounts must be changed every 90 days.

State EMS Data Managers and Software Vendor companies, please notify the TAC when an Okta account needs to be disabled.
