Overview

This report provides an overview of the key projects led by the NEMSIS Technical Assistance Center (TAC) during the past month.

Stakeholder Appreciation

We extend gratitude to the thousands of EMS clinicians, state and territory EMS offices, software vendors, and national partners whose dedication makes the EMS data collection possible. Your efforts ensure that EMS data can guide evidence-based care, shape policy, and improve patient outcomes nationwide.

Stakeholder Engagement

v3 Implementation Calls

[December 10: v3 Implementation Call](#)

Attendees: 122 (Representatives from 22 States and 36 Vendors)

December 24: v3 Implementation Call - *Canceled for the Christmas Holiday*

Upcoming NEMSIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:

- January 14
- January 28

Link to join: <https://utah-health.zoom.us/j/8085088800>

Public Training

NEMSIS Public Training

A public training was held on Tuesday, December 2, 2025, and presented by Joshua Legler, EMS Consultant. The session was titled NEMSIS Data Validation Using XML Schema and Schematron. Joshua suggested if you hear the word "Schematron" and aren't quite sure what it is, this training is for you. If you're confused about the difference between "XML Schema" and "Schematron," this training will clear it up. Joshua explained the basics of validating NEMSIS data using XML Schema and Schematron, with a focus on what makes Schematron different from XML Schema, why NEMSIS uses both, and how it all works together.

If you missed the training and would like to review the information, please click here to access the [December Public Training](#).

If you want to suggest a training, please submit the topic using the [NEMSIS Help Desk](#).

v3.4 and v3.5 Data Submission Summary

The NEMSIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using both the v3.4 and v3.5 data standards.

The counts listed below represent activity from January 1, 2025, through December 31, 2025. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.5 standard were 59,700,043 records from 14,223 agencies.
State submissions using the v3.4 standard were 1,723,910 records from 1,741 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for v3.4 and v3.5 data submissions is 4.88%.

NEMESIS Critical Patch Update

October 1, 2025, the NEMESIS TAC released resources for implementing Critical Patch v3.5.0 (CP6) and v3.5.1 (CP2). The resources relate to changes made to ePatient.25 and to a 1:1 recurrence.

On December 29, 2025, the NEMESIS TAC made an announcement for a temporary reset of the National repository to **Version 3.5.0 CP5 and Version 3.5.1 CP1**, scheduled for **Friday, January 9, 2026**. No modifications to State repositories or agency software products will be initiated or are required.

The primary reason for this action is to facilitate complete data collection for the 2025 year. Resetting the National repository to Version 3.5.0 CP5 and Version 3.5.1 CP1 will allow the NEMESIS TAC to accept historical records created prior to November 4, 2025, which is critical for producing a more complete and accurate 2025 National research dataset.

Additionally, a small number of states are still experiencing submission failures related to Version 3.5.0 CP6. This action will provide those states with additional time to resubmit record failures and fully resolve outstanding issues prior to reinitiating Version 3.5.0 CP6 and Version 3.5.1 CP2.

This action is temporary, intentional, and supports the integrity of the 2025 research data and operational stability of states.

At this time, the NEMESIS TAC anticipates restoring to the National repository to Version 3.5.0 CP6 and Version 3.5.1 CP2 on **April 1, 2026**, pending successful resolution of outstanding issues.

If you have questions please feel free to submit them to the [NEMESIS Help Desk](#).

v3 Software Vendor Compliance

The [V3 Compliant Software Testing Status](#) page reflects v3.5.0 and v3.5.1 compliant software products and the companies that are completing the critical patch testing. A list of all NEMESIS-compliant software products and companies seeking compliance can be found on the website.

In Compliance Testing NEMESIS v3.5.1 Collect Data

Beyond Lucid, Mediview, v4.x

EPR Systems, FireWorks, v1.5

First Due, First Due, v1.0

Saffire Software, MetroPCR, v3.x

In Compliance Testing NEMESIS v3.5.1 Receive and Process

INETCORE Software Solutions Inc, INCSS-ePCR, v3.5.1

Completed NEMESIS v3.5.0 Collect Data

ESO Solutions, ESO EHR, v5.1

Texas Health and Human Services, EMSTR, v1.0

Completed NEMESIS v3.5.1 Collect Data

ESO Solutions, ESO EHR, v5.1

Emergency Networking, ENcharge, v3.5

AngelTrack, Mockingbird, v2.1

Completed NEMESIS v3.5.0 Receive and Process

Ohio Department of Public Safety, EMSIRS, v3.5.0

v3.5.0 Compliant Software Products

*Vendors listed
in **red** are on probation
based on the NEMESIS
Compliance Standards.

State Data Manager Annual Report

The NEMSIS TAC has published the [State Data Manager Annual Report Template](#).

This resource was created to help state EMS data managers compare their state data to national benchmarks. This customizable template includes sections on EMS activations, patient demographics, clinical data, performance measures, and more. Most slides feature national data on the left and space for your state's data on the right. You can easily add or remove slides, insert your own charts or images, and export the report in multiple formats including PDF, Word, image files, or PowerPoint Show.

We encourage you to download the customizable PowerPoint template to create your state's annual EMS data report, featuring national benchmarks from NEMSIS and flexible formatting options. ([Intro video](#))

NEMSIS/ NASEMSO Collaboration

Agenda topics from the NEMSIS/NASEMSO Data Managers Council (DMC) meeting:

- Discussed the critical patch (CP6) implementation plans
 - Introduction of NEMSIS new hire Josh Nation
 - NEMSIS request for all 2025 data
 - Discussed the attributes of the National (Public) Prehospital Blood Transfusion Dashboard
 - Discussed the NEMSIS priority projects
 - Proposed process for change request
 - Announced NHTSA updates
-

Public-Release Research Dataset

The NEMSIS TAC produces an annual Public-Release Research Dataset. The 2024 dataset included over 60 million EMS activations submitted by 14,756 EMS agencies serving 54 states and territories.

The Public-Release Research Dataset aims to improve understanding of, confidence in, and support for EMS data collection and the analysis that will lead to improved patient care. The dataset is the largest publicly available resource of emergency medical service activations in the United States. The dataset does not contain information that identifies patients, EMS agencies, receiving hospitals, or reporting states.

The TAC fulfilled 26 research requests in December and a total of 454 for the 2025 calendar year.

If you have questions, please access the [Research dataset FAQ 2024](#).

If can also request the NEMSIS Public-Release Research Dataset by submitting a [Help Desk Ticket](#).

Okta User Accounts

All NEMSIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. All accounts inactive for 60 days are automatically locked.

If you need to reset your password, use the [Forgot Password](#) link located in the footer of the NEMSIS website. If you are unsuccessful with the password reset, wait 30 minutes and try again. If you are still unsuccessful with the reset instructions, submit a [Help Desk Ticket](#) and choose General NEMSIS Questions from the options. Passwords for Okta accounts must be changed every 90 days.

State EMS Data Managers and Software Vendor companies, please notify the TAC when an Okta account needs to be disabled.

v3 Data Use Agreements

We encourage State EMS Data Managers and Directors to continue efforts to execute the [NEMESIS v3.5 DUA](#).

The TAC works closely with the University of Utah's Office of Sponsored Projects (OSP) and the Privacy Compliance Office to review all legal modifications to the standard DUA. We are committed to working with officials in each state and territory to ensure that the DUA meets the needs of each respective state agency. Please contact Monet.Iheanacho@hsc.utah.edu to complete the DUA agreements.
