MONTHLY ACTIVITY REPORT JANUARY 2026

Records in the v3 Database (Total)*	2026 Year-to-Date Events*	Participating States/Territories	Reporting Agencies
411,195,846	4,580,364	54	14,756

Overview

This report provides an overview of the key projects led by the NEMSIS Technical Assistance Center (TAC) during the past month.

Stakeholder Engagement

v3 Implementation Calls

January 14: v3 Implementation Call
Attendees: 122 (Representatives from 27 States and 42 Vendors)

January 28: v3 Implementation Call
Attendees: 126 (Representatives from 23 States and 42 Vendors)

Upcoming NEMSIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:
- February 11
- February 25

Link to join: https://utah-health.zoom.us/j/8085088800

Public Training

NEMSIS Public Training

A public training was held on Tuesday, January 6, 2025, and presented by Clay Mann, PhD, NEMSIS Principal Investigator. The session was titled, "Explore What's New in NEMSIS v3.5.1." Dr. Mann highlighted the enhancements made to the NEMSIS data standard associated with the minor revisions to Version 3.5.1. Details were shared regarding the technical attributes of a "minor" vs. "major" revision and what the attributes mean in relation to implementation of NEMSIS versions.

If you missed the training and would like to review the information, please click here to access the January Public Training.

The NEMSIS public trainings are hosted the first Tuesday of the month at 10 AM (MDT), unless there is a national holiday during the same week, in which they are scheduled for the second Tuesday.

If you want to suggest a training or have your email added to receive notifications, please use the NEMSIS Help Desk.

New NEMSIS Datasets

We are excited to announce a new navigation tab on the NEMSIS website specifically dedicated to the NEMSIS Public Use Web Based Data Subsets.

There are currently twenty Public Use Datasets (PUD) available. The datasets are intended to increase the accessibility of the NEMSIS public release research data by sub-setting the volume and number of variables to existing NEMSIS case definitions. These datasets represent commonly investigated patient conditions that may prove useful to investigators focused on EMS care offered these sub-populations. Additional information regarding the criteria and variables are provided for each dataset.

NEMSIS collects an established national dataset heavily focused on data points that cannot be directly linked to identified individual patients, EMS agencies, providers, hospitals, or states.

The datasets are conveniently accessible by clicking on each tile and downloading the dataset to your desktop. There are no individual request forms needed to access the datasets. Additional years of data will be provided for each dataset as it is available.

*Duplicates are removed.

NEMSIS Critical Patch Update

October 1, 2025, the NEMSIS TAC released resources for implementing Critical Patch v3.5.0 (CP6) and v3.5.1 (CP2). The resources relate to changes made to ePatient.25 and to a 1:1 recurrence.

On December 29, 2025, the NEMSIS TAC made an announcement for a temporary reset of the National repository to **Version 3.5.0 CP5 and Version 3.5.1 CP1,** scheduled for **Friday, January 9, 2026.** No modifications to State repositories or agency software products will be initiated or are required.

The primary reason for this action is to facilitate complete data collection for the 2025 year. Resetting the National repository to Version 3.5.0 CP5 and Version 3.5.1 CP1 will allow the NEMSIS TAC to accept historical records created prior to November 4, 2025, which is critical for producing a more complete and accurate 2025 National research dataset.

Additionally, a small number of states are still experiencing submission failures related to Version 3.5.0 CP6. This action will provide those states with additional time to resubmit record failures and fully resolve outstanding issues prior to reinitiating Version 3.5.0 CP6 and Version 3.5.1 CP2.

This action is temporary, intentional, and supports the integrity of the 2025 research data and operational stability of states.

At this time, the NEMSIS TAC anticipates restoring to the National repository to Version 3.5.0 CP6 and Version 3.5.1 CP2 on **April 1, 2026**, pending successful resolution of outstanding issues.

If you have questions please feel free to submit them to the NEMSIS Help Desk.

v3.4 and v3.5 Data Submission Summary

The NEMSIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using both the v3.4 and v3.5 data standards.

The counts listed below represent activity from January 1, 2026, through January 31, 2026.
The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.5.1 standard were 200,086 records from 815 agencies.
State submissions using the v3.5 standard were 4,339,228 records from 12,119 agencies.
State submissions using the v3.4 standard were 41,278 records from 293 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for v3.4 and v3.5 data submissions is 0.81%.

v3 Software Vendor Compliance

The V3 Compliant Software Testing Status page reflects v3.5.0 and v3.5.1 compliant software products and the companies that are completing the critical patch testing. A list of all NEMSIS-compliant software products and companies seeking compliance can be found on the website.

In Compliance Testing NEMSIS v3.5.1 Collect Data

EPR Systems, FireWorks, v1.5

Echo Care, Echo Care v1.x.x

OCI Software, AmbuPro EMS, v26.0

Saffire Software, MetroPCR, v3.x

Sansio, HealthEMS, v5.x

Completed NEMSIS v3.5.0 Collect Data

Beyond Lucid, Mediview, v4.x

First Due, First Due, v1.0

v3.5.0 Compliant Software Products

*Vendors listed in **red** are on probation based on the NEMSIS Compliance Standards.*

Public-Release Research Dataset

We extend gratitude to the thousands of EMS clinicians, state and territory EMS offices, software vendors, and national partners whose dedication makes the EMS data collection possible. Your efforts ensure that EMS data can guide evidence-based care, shape policy, and improve patient outcomes nationwide.

The NEMSIS TAC is preparing to produce the next annual Public-Release Research Dataset. We are working closely with states and vendors to receive all data for the 2025 calendar year by Friday, February 13, 2026. The 2025 dataset is currently estimated to included approximately 63 million EMS activations submitted by nearly 15,000 EMS agencies serving 54 states and territories.

The Public-Release Research Dataset aims to improve understanding of, confidence in, and support for EMS data collection and the analysis that will lead to improved patient care. The dataset is the largest publicly available resource of emergency medical service activations in the United States. The dataset does not contain information that identifies patients, EMS agencies, receiving hospitals, or reporting states.

The TAC fulfilled 38 dataset requests in January and a total of 454 for the 2025 calendar year.

We will make announcement when the 2025 Public-Release Research Dataset is available. If you want to request an older version of the Public-Release Research Dataset, please submit a Help Desk Ticket.

NEMSIS/ NASEMSO Collaboration

Agenda topics from the NEMSIS/NASEMSO Data Managers Council (DMC) meeting:

- Discussed the wiki inclusion criteria for the annual report
- Announced the public use web based datasets posted on the website
- Discussed the national repository reset and data resubmission window
- Discussed the proposed change requests process
- Requested the submission of all 2025 patient care records
- Announced NHTSA updates

State Data Manager Annual Report

The NEMSIS TAC has published the State Data Manager Annual Report Template.

This resource was created to help state EMS data managers compare their state data to national benchmarks. This customizable template includes sections on EMS activations, patient demographics, clinical data, performance measures, and more. Most slides feature national data on the left and space for your state's data on the right. You can easily add or remove slides, insert your own charts or images, and export the report in multiple formats including PDF, Word, image files, or PowerPoint Show.

We encourage you to download the customizable PowerPoint template to create your state's annual EMS data report, featuring national benchmarks from NEMSIS and flexible formatting options. Please use this link to the (Introduction video).

v3 Data Use Agreements	We encourage State EMS Data Managers and Directors to continue efforts to execute the NEMSIS v3.5 DUA.
	The TAC works closely with the University of Utah's Office of Sponsored Projects (OSP) and the Privacy Compliance Office to review all legal modifications to the standard DUA. We are committed to working with officials in each state and territory to ensure that the DUA meets the needs of each respective state agency. Please contact Monet.Iheanacho@hsc.utah.edu to complete the DUA agreements.
Okta User Accounts	All NEMSIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. We kindly request that State EMS Data Managers and Software Vendor companies notify the TAC when an Okta account needs to be disabled.
	All accounts inactive for 60 days are automatically locked. Passwords for Okta accounts also must be changed every 90 days or they are locked.
	Okta accounts **can be unlocked** using the Forgot Password link located in the footer of the NEMSIS website.
	Here is a summary of the password reset instructions:
	Open the Okta sign in page. Input your username, which is your business email address. You will be taken to the Get a verification email screen, check that the obfuscated email address shown matches the email of your OKTA account. The email link will only be good for 5 minutes. Create a new password which meets the password requirements and press Reset Password.
	If you are unsuccessful with the password reset, wait 30 minutes and try again. If your password reset attempts are unsuccessful, submit a Help Desk Ticket and choose General NEMSIS Questions from the options.
Contact Us	Have questions or suggestions about additions for improvement to this report?
	Please submit a Help Desk Ticket at: https://nemsis.atlassian.net/servicedesk/customer/portals

Please follow the NEMSIS TAC on Social Media
