Overview

This report provides an overview of the key projects led by the NEMESIS Technical Assistance Center (TAC) during the past month.

Stakeholder Engagement

v3 Implementation Calls

[February 11: v3 Implementation Call](#)

Attendees: 114 (Representatives from 25 States and 29 Vendors)

[February 25: v3 Implementation Call](#)

Attendees: 129 (Representatives from 30 States and 31 Vendors)

Upcoming NEMESIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:

- March 11
- March 25

Link to join: <https://utah-health.zoom.us/j/8085088800>

Public Training

NEMESIS Public Training

A public training was held on Tuesday, February 3, 2026, presented by John Britt, NEMESIS Technical Business Analyst. The session was titled, "Data Completeness in Preparation for the Public Research Dataset." John discussed what the NEMESIS TAC receives, what's missing, and why it matters. The training provided valuable insight into how data completeness affects downstream use and why thorough submission is critical for the EMS community. Participants received a practical refresher on using the dashboards effectively, helping them better evaluate their data, understand areas for improvement, and support higher-quality data submissions for research and public use.

If you missed the training and would like to review the information, please click here to access the [February Public Training](#).

The NEMESIS public trainings are hosted the first Tuesday of the month at 10 AM (MDT).

If you want to suggest a training or have your email added to receive notifications, please use the [NEMESIS Help Desk](#).

New NEMESIS Datasets

We are excited to announce a new navigation tab on the NEMESIS website specifically dedicated to the [NEMESIS Public Use Web Based Data Subsets](#).

There are currently twenty Public Use Datasets (PUD) available. The datasets are intended to increase the accessibility of the NEMESIS public release research data by sub-setting the volume and number of variables to existing NEMESIS case definitions. These datasets represent commonly investigated patient conditions that may prove useful to investigators focused on EMS care offered to these sub-populations. Additional information regarding the criteria and variables are provided for each dataset.

NEMESIS collects an established national dataset heavily focused on data points that cannot be directly linked to identified individual patients, EMS agencies, providers, hospitals, or states.

The datasets are conveniently accessible by clicking on each tile and downloading the dataset to your desktop. There are no individual request forms needed to access the datasets. Additional years of data will be provided for each dataset as it is available.

*Duplicates are removed.

NEMESIS/ NAEMSO Collaboration

Agenda topics from the NEMESIS/NAEMSO Data Managers Council (DMC) meeting:

- Discussed the status of the critical patch reset
- Announced the release of the data dictionary and guidance related to Violence Against EMS
- Discussed the preferred communication methods related to v3.5.2 requests
- Requested updates for transition timelines and resources on state webpages
- Announced NHTSA updates

Annual Report Template

The NEMESIS TAC has published the [State Data Manager Annual Report Template](#).

This resource was created to help state EMS data managers compare their state data to national benchmarks. This customizable template includes sections on EMS activations, patient demographics, clinical data, performance measures, and more. Most slides feature national data on the left and space for your state's data on the right. You can easily add or remove slides, insert your own charts or images, and export the report in multiple formats including PDF, Word, image files, or PowerPoint Show.

We encourage you to download the customizable PowerPoint template to create your state's annual EMS data report, featuring national benchmarks from NEMESIS and flexible formatting options. Please use this link to the [Introduction video](#).

Data Submission Summary

The NEMESIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using the v3.4, v3.5, and v3.5.1 data standards.

The counts listed below represent activity from February 1, 2026, through February 28, 2026. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.5.1 standard were 519,805 records from 876 agencies.
State submissions using the v3.5 standard were 8,951,906 records from 12,752 agencies.
State submissions using the v3.4 standard were 89,550 records from 368 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for v3.4 and v3.5 data submissions is 0.67%.

Okta User Accounts

All NEMESIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. We kindly request that State EMS Data Managers and Software Vendor companies notify the TAC when an Okta account needs to be disabled.

All accounts inactive for 60 days are automatically locked. Passwords for Okta accounts also must be changed every 90 days or they are locked.

Okta accounts **can be unlocked** using the [Forgot Password](#) link located in the footer of the NEMESIS website.

Here is a summary of the password reset instructions:

Open the Okta sign in page. Input your username, which is your business email address. You will be taken to the [Get a verification email](#) screen, check that the obfuscated email address shown matches the email of your OKTA account. The email link will only be good for 5 minutes. Create a new password which meets the password requirements and press Reset Password.

If you are unsuccessful with the password reset, wait 30 minutes and try again. If your password reset attempts are unsuccessful, submit a [Help Desk Ticket](#) and choose General NEMESIS Questions from the options.

Public-Release Research Dataset

We extend gratitude to the thousands of EMS clinicians, state and territory EMS offices, software vendors, and national partners whose dedication makes the EMS data collection possible. Your efforts ensure that EMS data can guide evidence-based care, shape policy, and improve patient outcomes nationwide.

The NEMESIS TAC is preparing to produce the next annual Public-Release Research Dataset. We are working closely with states and vendors to receive all data for the 2025 calendar year by Friday, February 13, 2026. The 2025 dataset is currently estimated to include approximately 63 million EMS activations submitted by nearly 15,000 EMS agencies serving 54 states and territories.

The Public-Release Research Dataset aims to improve understanding of, confidence in, and support for EMS data collection and the analysis that will lead to improved patient care. The dataset is the largest publicly available resource of emergency medical service activations in the United States. The dataset does not contain information that identifies patients, EMS agencies, receiving hospitals, or reporting states.

The TAC fulfilled 38 datasets in February and a total of 454 for the 2025 calendar year.

We will make announcement when the 2025 Public-Release Research Dataset is available. If you want to request an older version of the Public-Release Research Dataset, please submit a [Help Desk Ticket](#).

NEMESIS Critical Patch Update

October 1, 2025, the NEMESIS TAC released resources for implementing Critical Patch v3.5.0 (CP6) and v3.5.1 (CP2). The resources relate to changes made to ePatient.25 and to a 1:1 recurrence.

On December 29, 2025, the NEMESIS TAC made an announcement for a temporary reset of the National repository to **Version 3.5.0 CP5 and Version 3.5.1 CP1**, scheduled for Friday, January 9, 2026. No modifications to State repositories or agency software products will be initiated or are required.

The primary reason for this action is to facilitate complete data collection for the 2025 year. Resetting the National repository to Version 3.5.0 CP5 and Version 3.5.1 CP1 will allow the NEMESIS TAC to accept historical records created prior to November 4, 2025, which is critical for producing a more complete and accurate 2025 National research dataset.

Additionally, a small number of states are still experiencing submission failures related to Version 3.5.0 CP6. This action will provide those states with additional time to resubmit record failures and fully resolve outstanding issues prior to reinitiating Version 3.5.0 CP6 and Version 3.5.1 CP2.

This action is temporary, intentional, and supports the integrity of the 2025 research data and operational stability of states.

At this time, the NEMESIS TAC anticipates restoring the National repository to Version 3.5.0 CP6 and Version 3.5.1 CP2 on **April 1, 2026**, pending successful resolution of outstanding issues.

If you have questions please feel free to submit them to the [NEMESIS Help Desk](#).

v3 Software Vendor Compliance Update

The [V3 Compliant Software Testing Status](#) page reflects both v3.5.0 and v3.5.1 compliant software products. Listed below are the software vendor companies seeking NEMESIS compliance and the versions that are being tested and completed. You can use the toggle feature on the webpage to switch between v3.5.0 and v3.5.1 and view all the compliant software.

In Compliance Testing NEMESIS v3.5.1 Collect Data

EPR Systems, FireWorks, v1.5
 Datadvanced-Hatzalah.live v1.1
 Sansio, HealthEMS, v5.x
 FusionEMS Quantum LLC-Fusion EMS Quantum v2.0.0
 ZOLL Data System-ZOLL RescueNet ePCR v6.9
 ZOLL Data System-ZOLL emsCharts v4.351
 MacroLogic, Inc.-CodeRed EMS v4.x
 Forte Holdings Inc.-iPCR v3.7.x
 OCI Software, AmbuPro EMS, v26.0

Completed NEMESIS v3.5.1 Collect Data

Digitech Computer LLC-TripTix v4.3
 RAM Software Systems, Inc.-AIM Online v5.0
 Echo Care, Echo Care v1.x.x
 iPad Mobile Solutions, LLC-IMS ePCR v3.5.1
 Saffire Software, MetroPCR, v3.x

**v3 Data Use
Agreements**

We encourage State EMS Data Managers and Directors to continue efforts to execute the [NEMESIS v3.5 DUA](#).

The TAC works closely with the University of Utah's Office of Sponsored Projects (OSP) and the Privacy Compliance Office to review all legal modifications to the standard DUA. We are committed to working with officials in each state and territory to ensure that the DUA meets the needs of each respective state agency. Please contact Monet.Iheanacho@hsc.utah.edu to complete the DUA agreements.
