## Overview

This report provides an overview of the key projects led by the NEMESIS Technical Assistance Center (TAC) during the past month.

## Stakeholder Engagement

### v3 Implementation Calls

[March 11: v3 Implementation Call](#)

Attendees: 130 (Representatives from 27 States and 34 Vendors)

[March 25: v3 Implementation Call](#)

Attendees: 130 (Representatives from 24 States and 33 Vendors)

### Upcoming NEMESIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:

- April 8
- April 22

Link to join: <https://utah-health.zoom.us/j/8085088800>

## Public Training

### NEMESIS Public Training

A public training was held on Tuesday, March 3, 2026, presented by guests, Dr. Bryan Wilson, and Sheree Murphy, both are members of the National EMS Quality Alliance (NEMSQA). The session was titled "Operationalizing the Evidence: Development of Prehospital Post-Crash Care Clinical Quality Measures Using the NEMESIS Dataset." The presentation provided valuable insight into the importance of prehospital care in post-MVC outcomes and alignment with national priorities for improving post-crash trauma care. Ms. Murphy described the process for the identification and development of measures including the methodology for scoring and ranking, the rationale and importance of the measures developed, and future considerations.

If you missed the training and would like to review the information, please click here to access the [March Public Training](#).

The NEMESIS public trainings are hosted the first Tuesday of the month at 10 AM (MDT).

If you want to suggest a training or have your email added to receive notifications, please use the

## New NEMESIS Datasets

For better alignment with data research requests, we moved the location of the [NEMESIS Public Use Web Based Data Subsets](#) within the **Using EMS Data** navigation tab.

There are currently twenty Public Use Datasets (PUD) available. The datasets are intended to increase the accessibility of the NEMESIS public release research data by sub-setting the volume and number of variables to existing NEMESIS case definitions. These datasets represent commonly investigated patient conditions that may prove useful to investigators focused on EMS care offered to these sub-populations. Additional information regarding the criteria and variables are provided for each dataset.

NEMESIS collects an established national dataset heavily focused on data points that cannot be directly linked to identified individual patients, EMS agencies, providers, hospitals, or states.

The datasets are conveniently accessible by clicking on each tile and downloading the dataset to your desktop. There are no individual request forms needed to access the datasets. Additional years of data will be provided for each dataset as it is available.

\*Duplicates are removed.

---

**NEMESIS/  
NASEMSO  
Collaboration**

Agenda topics from the NEMESIS/NASEMSO Data Managers Council (DMC) meeting:

- Discussed the v3.5.2 change request inclusions
- Announced the new location of the NEMESIS data subsets
- Discussed the plan to release a new public dataset in April
- Announced NHTSA OEMS updates

---

**Violence  
Against EMS  
Personnel  
Resource**

In collaboration with NASEMSO, the NEMESIS TAC published a spreadsheet of new data elements and developed the HAZDataSet to document violence against EMS personnel specifically.

This resource helps EMS stakeholders improve documentation practices, increase awareness and reporting, and ultimately support efforts to prevent violence against EMS personnel.

It is available on the NEMESIS website under Technical Resources, Guides and Usage, in the section titled "Violence Against EMS Personnel." <https://nemsis.org/technical-resources/version-3/version-3-xsd-guides-usage/>

---

**Data  
Submission  
Summary**

The NEMESIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using the v3.4, v3.5, and v3.5.1 data standards.

The counts listed below represent activity from Jan 1, 2026, through March 31, 2026. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.5.1 standard were 866,964 records from 890 agencies.  
State submissions using the v3.5 standard were 13,937,808 records from 13,094 agencies.  
State submissions using the v3.4 standard were 130,472 records from 387 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for v3.4 and v3.5 data submissions is 1.11%.

---

**Okta User  
Accounts**

All NEMESIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. We kindly request that State EMS Data Managers and Software Vendor companies notify the TAC when an Okta account needs to be disabled.

All accounts inactive for **60 days** are automatically locked. Passwords for Okta accounts also must be changed every **60 days** or they are locked.

Okta accounts **can be unlocked** using the [Forgot Password](#) link located in the footer of the NEMESIS website.

Here is a summary of the password reset instructions:

Open the Okta sign in page. Input your username, which is your business email address. You will be taken to the [Get a verification email](#) screen, check that the obfuscated email address shown matches the email of your OKTA account. The email link will only be good for 5 minutes. Create a new password which meets the password requirements and press Reset Password.

If you are unsuccessful with the password reset, wait 30 minutes and try again. If your password reset attempts are unsuccessful, submit a [Help Desk Ticket](#) and choose General NEMESIS Questions from the options.

---

## Public-Release Research Dataset

We are grateful to the thousands of EMS clinicians, state and territory EMS offices, software vendors, and national partners whose dedication makes the EMS data collection possible. Your efforts ensure that EMS data can guide evidence-based care, shape policy, and improve patient outcomes nationwide.

The NEMESIS TAC is preparing the next annual Public-Release Research Dataset. We worked closely with states and vendors to receive all data for the 2025 calendar year. The 2025 dataset will include approximately 63 million EMS activations submitted by nearly 15,000 EMS agencies serving 54 states and territories.

The Public-Release Research Dataset aims to improve understanding of, confidence in, and support for EMS data collection and the analysis that will lead to improved patient care. The dataset is the largest publicly available resource of emergency medical service activations in the United States. The dataset does not contain information that identifies patients, EMS agencies, receiving hospitals, or reporting states.

We will make a public announcement when the 2025 Public-Release Research Dataset is available.

Additionally, the TAC fulfilled 36 requests for older datasets in March.

Complete a [Help Desk Ticket](#) to request an any version of the Public-Release Research Dataset.

## NEMESIS Critical Patch Update

The NEMESIS TAC anticipates restoring the National repository to **Version 3.5.0 CP6 and Version 3.5.1 CP2**, pending successful resolution of outstanding issues.

You may recall that on October 1, 2025, the NEMESIS TAC released resources for implementing Critical Patch v3.5.0 (CP6) and v3.5.1 (CP2). The resources related to changes made to ePatient.25 and to a 1:1 recurrence.

On Friday, January 9, 2026, the NEMESIS TAC temporary reset of the National repository to Version 3.5.0 CP5 and Version 3.5.1 CP1.

The primary reason for this action was to facilitate complete data collection for the 2025 year. Resetting the National repository to Version 3.5.0 CP5 and Version 3.5.1 CP1 allowed the NEMESIS TAC to accept historical records created prior to November 4, 2025, which is critical for producing a more complete and accurate 2025 National research dataset.

Additionally, a small number of states were experiencing submission failures related to Version 3.5.0 CP6. This action provided those states additional time to resubmit record failures and fully resolve outstanding issues prior to reinitiating Version 3.5.0 CP6 and Version 3.5.1 CP2.

This action supported the integrity of the 2025 research data and operational stability of states.

If you have questions please feel free to submit them to the [NEMESIS Help Desk](#).

## v3 Software Vendor Compliance Update

The [V3 Compliant Software Testing Status](#) page reflects both v3.5.0 and v3.5.1 compliant software products. Listed below are the software vendor companies seeking NEMESIS compliance and the versions that are being tested and completed. On the webpage you can use the toggle feature to switch between v3.5.0 and v3.5.1 and view all the compliant software.

### **In Compliance Testing NEMESIS v3.5.1 Collect Data**

Datadvanced-Hatzalah.live v1.1  
 FusionEMS Quantum LLC-Fusion EMS Quantum v2.0.0  
 ZOLL Data System-ZOLL RescueNet ePCR v6.9  
 ZOLL Data System-ZOLL emsCharts v4.351  
 Remote Area Medicine-FirePCR v1.1  
 Fieldcare-app.fieldcare.ai v6.0.0

### **In Compliance Testing NEMESIS v3.5.1 Receive & Process**

Cloudwick Technologies-EMSFlow v1.1

### **Completed NEMESIS v3.5.1 Collect Data**

EPR Systems, FireWorks, v1.5  
 Unified Solutions-CloudPCR v5  
 MacroLogic, Inc.-CodeRed EMS v4.x  
 Forte Holdings Inc.-iPCR v3.7.x  
 OCI Software, AmbuPro EMS, v26.0  
 Sansio, HealthEMS, v5.x

## v3 Data Use Agreements

We encourage State EMS Data Managers and Directors to continue efforts to execute the [NEMESIS v3.5 DUA](#).

The TAC works closely with the University of Utah's Office of Sponsored Projects (OSP) and the Privacy Compliance Office to review all legal modifications to the standard DUA. We are committed to working with officials in each state and territory to ensure that the DUA meets the needs of each respective state agency. Please contact [Monet.Iheanacho@hsc.utah.edu](mailto:Monet.Iheanacho@hsc.utah.edu) to complete the DUA agreements.
