

2025 PUBLIC-RELEASE RESEARCH DATASET

**NOW
AVAILABLE**

63,635,893 EMS Activations
14,801 EMS Agencies
54 States and Territories

The National Emergency Medical Services Information System Technical Assistance Center (NEMSIS TAC) today announced the release of the 2025 Public-Release Research Dataset, the nation's largest publicly accessible dataset of emergency medical services (EMS) activations.

The 2025 Public-Release Research Dataset is a subset of the National EMS Database, a repository for EMS data collected from U.S. States and Territories. NEMSIS maintains the national standard for how patient care information, resulting from an emergency 911 call for medical assistance, is collected. The dataset includes 63,635,893 EMS activations submitted by 14,801 EMS agencies servicing 54 states and territories.

Those interested in requesting a copy of the 2025 Public-Release Research Dataset can contact the NEMSIS TAC and complete a request form on their website: <https://nemsis.org/using-ems-data/request-research-data>. A link will then be provided to download the dataset and supporting materials.
