Overview

This report provides an overview of the key projects led by the NEMSIS Technical Assistance Center (TAC) during the past month.

NEMSIS Annual Meeting

The **2026 NEMSIS Annual Meeting [registration is now open](#)**. Please join us October 6 - 9, 2026, to commemorate **25 Years of NEMSIS: A Legacy of Data, A Future of Care**, recognizing the program's impact on advancing EMS data and improving patient care nationwide.

We strongly encourage your participation during this in-person meeting, as your voice, expertise, and engagement are critical to shaping the future of the NEMSIS standard. You can also reserve rooms at the [resort](#) under the NEMSIS group block.

Please visit the website for the agenda and updates.

Stakeholder Engagement

v3 Implementation Calls

[June 10: v3 Implementation Call](#)

Attendees: 118 (Representatives from 25 States and 35 Vendors)

[June 24: v3 Implementation Call](#)

Attendees: 122 (Representatives from 27 States and 33 Vendors)

Upcoming NEMSIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:

- July 8
- July 22

Link to join: <https://utah-health.zoom.us/j/8085088800>

Public Training

NEMSIS Public Training

A public training, titled "NEMSIS Standard Change Request Process," was held on Tuesday, June 2, 2026, and presented by Josh Nation, NEMSIS Senior Business Data Analyst. The session provided participants with an overview of the request process, from identifying what qualifies as a change request to learning how submissions are reviewed, evaluated, and ultimately incorporated into future releases of the standard. Josh demonstrated how to properly document and submit a change request, navigate the governance and review cycle, and understand what happens after the submission.

The goal of the session was to clarify how EMS stakeholders contribute to the future direction of the NEMSIS data standard.

If you missed the training and would like to review the information, please click here to access the [June Public Training](#).

If you want to suggest a training topic, please use the [NEMSIS Help Desk](#).

New Blood Transfusion Report

The NEMESIS TAC is actively engaged in collaborations to advance knowledge and resources that support Pre-hospital Blood Transfusions. Demonstrating our commitment to data-driven innovation, our team analyzed national EMS data. We produced the 2024–2025 Blood Transfusion Report, providing an unprecedented national snapshot of 48,048 EMS-administered blood transfusion activations and informing future pre-hospital care initiatives.

The report documents a steady increase in utilization over the 24-month period and characterizes administration by transport mode, service type, patient demographics, and clinical context. These findings provide an initial national baseline to inform policy, system planning, and future data standard development related to prehospital transfusion practices.

We encourage you to download and share a copy of the report at <https://nemsis.org/using-ems-data/articles-and-publications/> under Special Topic Reports.

Data Submission Summary

The NEMESIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using the v3.4, v3.5, and v3.5.1 data standards.

The counts listed below represent activity from Jan 1, 2026, through June 30, 2026. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.5.1 standard were 1,872,597 records from 1,269 agencies.
State submissions using the v3.5 standard were 28,225,854 records from 13,709 agencies.
State submissions using the v3.4 standard were 245,246 records from 418 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for all data submissions is 0.56%.

Okta User Accounts

All NEMESIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. We kindly request that State EMS Data Managers and Software Vendor companies notify the TAC when an Okta account needs to be disabled.

All accounts inactive for **60 days** are automatically locked. Passwords for Okta accounts also must be changed every 60 days, or they are locked.

Okta accounts **can be unlocked** using the [Forgot Password](#) link located in the footer of the NEMESIS website.

Here is a summary of the password reset instructions:

Open the Okta sign-in page. Input your username, which is your business email address. You will be taken to the [Get a verification email](#) screen, check that the obfuscated email address shown matches the email of your OKTA account. The email link will only be good for 5 minutes. Create a new password which meets the password requirements and press Reset Password.

If you are unsuccessful with the password reset, wait 30 minutes and try again. If your password reset attempts are unsuccessful, submit a [Help Desk Ticket](#) and choose General NEMESIS Questions from the options.

v3 Data Use Agreements

We encourage State EMS Data Managers and Directors to execute the [NEMESIS v3.5 DUA](#).

The TAC works closely with the University of Utah's Office of Sponsored Projects (OSP) and the Privacy Compliance Office to review all legal modifications to the standard DUA. We are committed to working with officials in each state and territory to ensure that the DUA meets the needs of each respective state agency. Please contact Monet.Theanacho@hsc.utah.edu to complete the DUA agreements.

Public-Release Research Dataset

The NEMSIS TAC is pleased to announce the availability of the 2025 Public-Release Research Dataset, the nation's largest publicly accessible dataset of emergency medical services (EMS) activations. We are grateful to the thousands of EMS clinicians, state and territory EMS offices, software vendors, and national partners whose dedication makes the EMS data collection possible. Your efforts ensure that EMS data can guide evidence-based care, shape policy, and improve patient outcomes nationwide.

We worked closely with states and vendors to receive over 63 million EMS activations submitted by 14,801 EMS agencies serving 54 states and territories.

The Public-Release Research Dataset aims to improve understanding of, confidence in, and support for EMS data collection and the analysis that will lead to improved patient care. The dataset does not contain information that identifies patients, EMS agencies, receiving hospitals, or reporting states.

In June, we approved the release of 39 datasets. If you are interested in requesting a copy of the 2025 Public-Release Research Dataset, please complete a [request form](#) on the NEMSIS website.

NEMSIS/ NASEMSO Collaboration

Agenda topics from the NEMSIS/NASEMSO Data Managers Council (DMC) meeting:

- Discussed the 2025 Public Release-Research Dataset
- Provided sample of county-level data based on NEMSIS 3.5 DUAs
- Discussed the NEMSIS FAQ webpage
- Discussed the NEMSIS Annual Meeting registration
- Discussed sharing state EMS data with state FARS analysts

v3 Software Vendor Compliance Update

The [V3 Compliant Software Testing Status](#) page reflects both v3.5.0 and v3.5.1 compliant software products. Listed below are the software vendor companies seeking NEMSIS compliance and the versions that are being tested and completed. On the webpage you can use the toggle feature to switch between v3.5.0 and v3.5.1 and view all the compliant software.

In Compliance Testing NEMSIS v3.5.1 Collect Data

Remote Area Medicine-FirePCR v1.1
Fieldcare-app.fieldcare.ai v6.0.0
Paraglide LLC.-Paraglide v1.0.0
Epicle Inc.-Emcentra v1.0.0
ImageTrend-Elite v1.x
Nex EMS-NexEMS v1.2.1
Medidex Solutions-Rescue Link EMS v1.0

In Compliance Testing NEMSIS v3.5.1 Receive & Process

ImageTrend-Elite v1.x
Korta Health LLC.-Korta v1.0

Completed NEMSIS v3.5.1 Collect Data

Emergent-Emergent v1.0
SceneSafe-SceneSafe v1.0

Compliant Software Products v3.5.0 & v3.5.1
