Overview

This report provides an overview of the key projects led by the NEMSIS Technical Assistance Center (TAC) during the past month.

NEMSIS Annual Meeting

Please join us for the **2026 NEMSIS Annual Meeting**, scheduled October 6-9, 2026, in Heber, Utah. The [registration link](#) will remain open **until 4:00 PM (MDT) on Friday, September 18th**.

We encourage all NEMSIS stakeholders involved in the implementation of the standard over any time period to join us as we commemorate **25 Years of NEMSIS: A Legacy of Data, A Future of Care**, recognizing the program's impact on advancing EMS data and improving patient care nationwide.

This meeting will only be hosted in person to ensure broader participation and engagement.

This year, we will introduce a new, more interactive format based on feedback from state partners and software vendors. Instead of traditional presentations, participants will spend most of their time working in small Problem-Oriented Discussion (POD) groups to explore challenges, share perspectives, and develop practical solutions together.

Participants will be added to the five selected PODs:

A. Compliance

Focus: Compliance testing, state rules, validation, communication standards, version implementation

B. Tools & Resources

Focus: Education, communication, funding, training, working groups, support resources

C. End-User

Focus: Provider burden, workflow, documentation, practical usability

D. Standardizing Data

Focus: Facility IDs, dispositions, datasets, common definitions, NERIS alignment

E. Interoperability

Focus: Data exchange, submissions, APIs, outcomes data, integrations

Please considering joining us as we discuss the next phase of NEMSIS and EMS data collection.

Public Training

NEMSIS Public Training

A public training, titled "A Legal Perspective on the Use of AI in EMS," was held on Tuesday, August 4, 2026, and presented by guest Ryan Stark, Attorney/EMS Consultant with Page, Wolfberg, and Wirth. The session explored the evolving legal landscape surrounding the use of AI in EMS through the lens of healthcare law, HIPAA, documentation standards, reimbursement compliance, state AI regulations, and operational risk management.

The objective of the session was for participants to gain a practical understanding of where AI presents opportunity, where it creates exposure, and how EMS agencies can responsibly implement emerging technologies without compromising compliance or patient trust.

If you missed the session and would like to review the information, please click here to access the [August Public Training](#).

If you want to suggest a training topic, please let us know by submitting it here: [NEMSIS Help Desk](#).

*Duplicates are removed.

Stakeholder Engagement

v3 Implementation Calls

[August 12: v3 Implementation Call](#)

Attendees: 130 (Representatives from 23 States and 39 Vendors)

[August 26: v3 Implementation Call](#)

Attendees: 132 (Representatives from 26 States and 42 Vendors)

Upcoming NEMSIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:

- September 9 (Call Canceled)
- September 23

Link to join: <https://utah-health.zoom.us/j/8085088800>

NEMSIS/ NASEMSO Collaboration

Agenda topics from the NEMSIS/NASEMSO Data Managers Council (DMC) meeting:

- Discussed the NEMSIS Annual Meeting and POD Topics
- Discussed the expanded eMedications list for the Prehospital Blood Transfusion Program
- Discussed integrating crash and injury Surveillance Data Systems

New Blood Transfusion Report

The NEMSIS TAC is actively engaged in collaborations to advance knowledge and resources that support Pre-hospital Blood Transfusions. Demonstrating our commitment to data-driven innovation, our team analyzed national EMS data. We produced the 2024–2025 Blood Transfusion Report, providing an unprecedented national snapshot of 48,048 EMS-administered blood transfusion activations and informing future pre-hospital care initiatives.

The report documents a steady increase in utilization over the 24-month period and characterizes administration by transport mode, service type, patient demographics, and clinical context. These findings provide an initial national baseline to inform policy, system planning, and future data standard development related to prehospital transfusion practices.

We encourage you to download and share a copy of the report at <https://nemsis.org/using-ems-data/articles-and-publications/>.

Okta User Accounts

All NEMSIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. We kindly request that State EMS Data Managers and Software Vendor companies notify the TAC when an Okta account needs to be disabled.

All accounts inactive for **60 days** are automatically locked. Passwords for Okta accounts also must be changed every 60 days, or they are locked.

Okta accounts **can be unlocked** using the [Forgot Password](#) link located in the footer of the NEMSIS website.

If you are unsuccessful with the password reset, wait 30 minutes and try again. If your password reset attempts are unsuccessful, submit a [Help Desk Ticket](#) and choose General NEMSIS Questions from the options.

Data Submission Summary

The NEMSIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using the v3.4, v3.5, and v3.5.1 data standards.

The counts listed below represent activity from Jan 1, 2026, through August 31, 2026. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.5.1 standard were 3,257,964 records from 2,065 agencies.
State submissions using the v3.5 standard were 39,688,730 records from 13,999 agencies.
State submissions using the v3.4 standard were 343,392 records from 431 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for all data submissions is 0.89%.

Public-Release Research Dataset

The NEMSIS TAC is pleased to announce the availability of the 2025 Public-Release Research Dataset, the nation's largest publicly accessible dataset of emergency medical services (EMS) activations. We are grateful to the thousands of EMS clinicians, state and territory EMS offices, software vendors, and national partners whose dedication makes the EMS data collection possible. Your efforts ensure that EMS data can guide evidence-based care, shape policy, and improve patient outcomes nationwide.

We worked closely with states and vendors to receive over 63 million EMS activations submitted by 14,801 EMS agencies serving 54 states and territories.

The Public-Release Research Dataset aims to improve understanding of, confidence in, and support for EMS data collection and the analysis that will lead to improved patient care. The dataset does not contain information that identifies patients, EMS agencies, receiving hospitals, or reporting states.

In August, we approved the release of 65 datasets. If you are interested in requesting a copy of the 2025 Public-Release Research Dataset, please complete a [request form](#) on the NEMSIS website.

v3 Software Vendor Compliance Update

The [V3 Compliant Software Testing Status](#) page reflects both v3.5.0 and v3.5.1 compliant software products. Listed below are the software vendor companies seeking NEMSIS compliance and the versions that are being tested and completed. On the webpage you can use the toggle feature to switch between v3.5.0 and v3.5.1 and view all the compliant software.

In Compliance Testing NEMSIS v3.5.1 Collect Data

NexEMS-NexEMS v1.2.1
PodDispatch LLC.-Pod Dispatch v1.0
Alpha Event Medicine-AlphaPCR v5
Partret-Partret v1.0.0
Be The Change, LLC.-Medical Assessment and Non-Transport App v1.4.2
Korta Health LLC.-Korta v1.0
CCE Platform Inc.-CCE Platform v1.0

Completed NEMSIS v3.5.1 Collect Data
