Overview

This report provides an overview of the key projects led by the NEMSIS Technical Assistance Center (TAC) during the past month.

NEMSIS Annual Meeting

Thank you to everyone who attended the **2026 NEMSIS Annual Meeting, October 6–9 in Heber, Utah.**

We appreciate your time and participation helping the TAC commemorate **25 Years of NEMSIS** and recognizing the program's impact on advancing EMS data and improving patient care nationwide.

This year, we introduced the pod working group model and received encouraging feedback regarding the structure. Stakeholders spent most of the week working together in smaller groups to explore challenges, share perspectives, and develop practical solutions to key challenges facing our community. Initial survey results indicate that the majority of stakeholders enjoyed the interactive format mixed with some presentations.

Participants were added to the five selected Pods:

A. Compliance
Focus: Compliance testing, state rules, validation, communication standards, version implementation
B. Tools & Resources
Focus: Education, communication, funding, training, working groups, support resources
C. End-User
Focus: Provider burden, workflow, documentation, practical usability
D. Standardizing Data
Focus: Facility IDs, dispositions, datasets, common definitions, NERIS alignment
E. Interoperability
Focus: Data exchange, submissions, APIs, outcomes data, integrations

The results of the pod group discussions will be shared on the v3 Implementation calls. For stakeholders who wished to attend the annual meeting but were unable to join us in person, we will post the recordings and presentation on the 2026 Annual Meeting landing page on the website.

Additionally, we distributed a 25th Anniversary of NEMSIS booklet to participants and you can also access it on the website.

Stakeholder Engagement

v3 Implementation Calls

October 9: v3 Implementation Call - (*Canceled due to post Annual Meeting activity)*

October 28: v3 Implementation Call
Attendees: 133 (Representatives from 27 States and 38 Vendors)

Upcoming NEMSIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

** The November v3 Implementation Calls are canceled due to Veterans Day and theThanksgiving Holiday*

The next call date is:

- December 9
- December 23, *Canceled for Christmas Holiday Break*

Link to join: https://utah-health.zoom.us/j/8085088800

*Duplicates are removed.

MONTHLY ACTIVITY REPORT OCTOBER 2026

Public Training

NEMSIS Public Training

The NEMSIS TAC did not host a public training in October due to preparing for and hosting the NEMSIS Annual Meeting.

If you missed a session and would like to review any previous public trainings, they are available on the NEMSIS YouTube Channel.

If you want to suggest a training topic, please let us know by submitting it here: NEMSIS Help Desk.

NEMSIS/ NASEMSO Collaboration

Agenda topics from the NEMSIS/NASEMSO Data Managers Council (DMC) meeting:

- NEMSIS Annual Meeting Summary
- Presented and discussed the NEMSIS v3.5.2 Timeline and Resources
- Discussed Agencies with Pre-Hospital Blood Transfusion Programs, but currently have no data

v3.5.2 Release Timeline & Resources

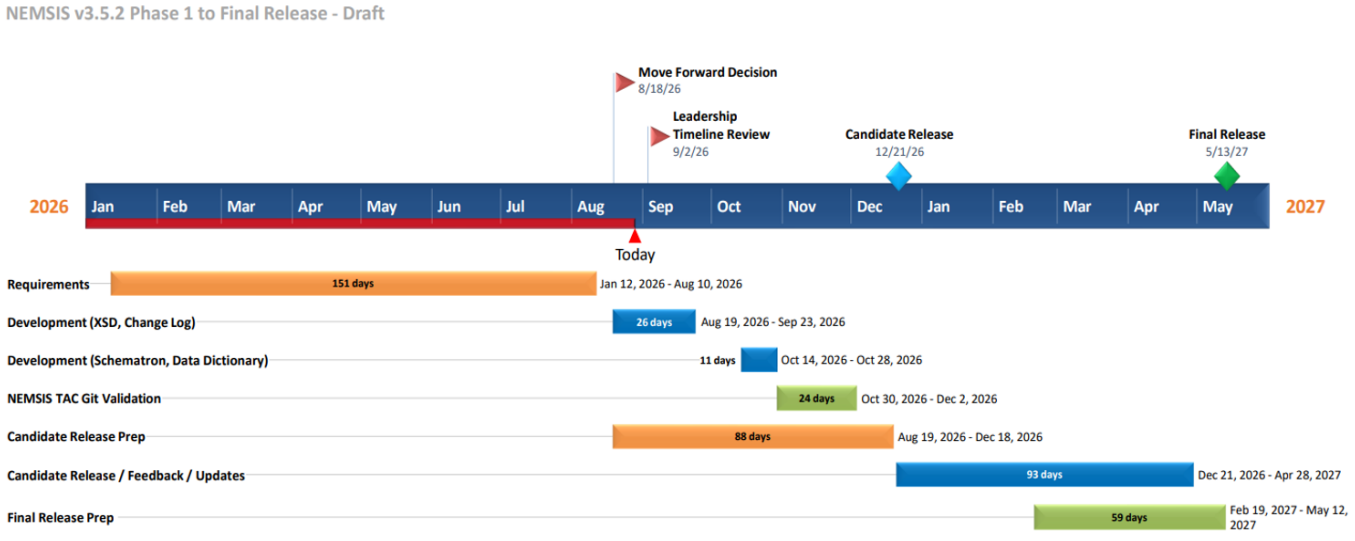

The NEMSIS TAC is pleased to announce the availability of the v3.5.2 Timeline and Resources on the NEMSIS website. The current timeline shows development phases to a v3.5.2 Candidate Release by December 2026. We recently shared the initial resources and scope for the v3.5.2 release on a Town Hall webinar. The requirements and development of the XSD and Change Log are completed. The Schematron and Data Dictionary will be available soon.

The scope includes a mix of technical updates, new optional elements, and alignment changes across the standard. While the v3.5.2 change request period is considered closed, emergency items can still be considered and added if necessary.

The final v3.5.2 Release is expected in May 2027.

Please review and share the spreadsheet of the fifty-four approved v3.5.2 requested changes to the NEMSIS Standard.

The resources are available at https://nemsis.org/v3-5-revision/v3-5-resources/

MONTHLY ACTIVITY REPORT OCTOBER 2026

Data Submission Summary

The NEMSIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using the v3.4, v3.5, and v3.5.1 data standards.

The counts listed below represent activity from January 1, 2026, through October 31, 2026. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.5.1 standard were 4,279,518 records from 2,560 agencies.
State submissions using the v3.5 standard were 46,819,2219 records from 14,113 agencies.
State submissions using the v3.4 standard were 402,064 records from 444 agencies.

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for all data submissions is 1.22%.

New Blood Transfusion Report

The NEMSIS TAC is actively engaged in collaborations to advance knowledge and resources that support Pre-hospital Blood Transfusions. Demonstrating our commitment to data-driven innovation, our team analyzed national EMS data. We produced the 2024–2025 Blood Transfusion Report, providing an unprecedented national snapshot of 48,048 EMS-administered blood transfusion activations and informing future pre-hospital care initiatives.

The report documents a steady increase in utilization over the 24 -month period and characterizes administration by transport mode, service type, patient demographics, and clinical context. These findings provide an initial national baseline to inform policy, system planning, and future data standard development related to prehospital transfusion practices.

We encourage you to download and share a copy of the report at https://nemsis.org/using-ems-data/articles-and-publications/.

v3 Software Vendor Compliance Update

The V3 Compliant Software Testing Status page reflects both v3.5.0 and v3.5.1 compliant software products. Listed below are the software vendor companies seeking NEMSIS compliance and the versions that are being tested and completed. On the webpage you can use the toggle feature to switch between v3.5.0 and v3.5.1 and view all the compliant software.

In Compliance Testing NEMSIS v3.5.1 Collect & Send

Ten-Eight Software, PLLC-Ten-Eight EMS Operations v1.0.0

Vital Care Health Technology LLC-Vital Care EPCR v1.0

MONTHLY ACTIVITY REPORT OCTOBER 2026

Okta User Accounts

All NEMSIS user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App. We kindly request that State EMS Data Managers and Software Vendor companies notify the TAC when an Okta account needs to be disabled.

All accounts inactive for **60 days** are automatically locked. Passwords for Okta accounts also must be changed every 60 days, or they are locked.

Okta accounts **can be unlocked** using the Forgot Password link located in the footer of the NEMSIS website.

If you are unsuccessful with the password reset, wait 30 minutes and try again. If your password reset attempts are unsuccessful, submit a Help Desk Ticket and choose General NEMSIS Questions from the options.
